

Concrete is one of the world's most versatile and widely used products. How it's made is critical to how it performs. All of our mixers are loaded by a computer dispatching system. The computer dispatching system helps with both timely delivery and efficiency, thus allowing us to serve you, our customers better. Having customers in both the public and private divisions of construction, **K & L Ready Mix** can be found in projects such as bridges, highways and driveways.

We make concrete to fit your specifications...your needs.

Equipment: K & L Ready Mix operates an extensive fleet of concrete mixers. We have [Stan](#)
[dard](#)
(Rear-Dump),
[Front-Dump](#)
and

[Conveyor](#)

trucks that reach up to 40 feet, in our fleet. Conveyor trucks are available at all of our locations; however, booking them in advance is advised.
